

April 14, 2014

Dear Customer,

You may have recently heard about the potential OpenSSL security vulnerability, known as "Heartbleed", affecting some secure websites. Viztek & 20/20 Imaging takes security seriously and has reviewed all of our external and internal systems for this vulnerability along with all of the third party services we employ. After conducting our review we've noted that no Viztek or 20/20 Imaging service is affected by this vulnerability.

Because we share the responsibility of securing our network we ask that you as our partner review your services to determine if this vulnerability impacts them. You can find detailed information about the issue at: <http://web.nvd.nist.gov/view/vuln/detail?vulnId=CVE-2014-0160>, and what to do in the event it impacts your services. Viztek & 20/20 Imaging appreciates your quick review of this issue.

Thank You,

Best Regards,

Stephen Hathaway
Vice President of Operations
